Web Site News

I am beginning a complete overhaul of the Class Pack site.

Be sure to keep an eye out for exciting changes!

If you have any suggestions, let me know!

Congratulations to Blake Babbs on the success of your new CD!

For those of you who haven't heard, Blake and a couple friends have formed the Full Circle Band. They released their first Gospel CD, Pure and Simple, on August 10th. You can check out their web site at www.fullcirclebandonline.com

J U L Y M E E T I N G N O T E S

The July meeting was held at Dennis Overton's home and they provided a very nice lunch for us. Many thanks it was great. Jeff Gannaway says the belt buckles are ordered and if you have not paid you need to pay Leland. It was brought up that The Midwest Charity Cruise for Sangamon Co. will be Sept. 8th & 9th. The route is from Lincoln Park to downtown Springfield. It's \$12.00 for pre registration or \$15.00 at the time of the event. The swap meet talk was to have a

two day event rather than one day to make things easier on everybody. Also to try and bring in more vendors. This in turn may bring in a bigger crowd of spectators. The motion was made and carried. Larry Wesch is again heading up the "Bad to the bone" car show this year. If anyone is interested in giving a hand it would be appreciated. It will be held at Peterson Park. Check with Larry for time and date. The next club meeting will be a little different. It will

be at Neoga Park on Thursday, Aug. 17th. at 6:30 pm. This is a pot luck dinner. Everyone should bring a covered dish. It wasn't very clear about drinks and dinner service so to be safe you might want to bring your own. It's kind of hard to eat pork and beans with your bare hands and people tend to look at you kind of funny. That's all I have for now, hope to see all of you guys & girls at the meeting.

Mike Drummond

I would like to thank ALL the Class Pack members and families for your help and support last year! The Swap was a GREAT success! THANK YOU!!!! ~Leland

This year is the Class Pack's 20th Anniversary Swap Meet. We would like all the members to be involved this year!

This year's Swap will be a 2 day event, held on April 14 & 15. Put your thinking cap on and bring your ideas to the next meeting!

I think having chairman's worked very well last year, so we are going to try that again.

Some of the of the chairman positions we need to fill are:

- Vendor Registration
- Vendor Parking
- Spectator Parking
- Car Show
- Magazine Advertising
- Flyer Distribution
- Radio/TV Advertising
- Newspaper Advertising
- Concessions
- Public Relations

- Clean Up
- Work Schedule
- Financial
- Spectator Registration/Door Prizes
- PA System
- Main Gate

And any other chairman that you guys see fit.

Please see Leland if you are interested in being a chairperson!

JULY MEETING NOTES

We had great July meeting at Dennis Overton's over by Altamont, it was worth the trip. We sat around outside and shot the breeze for awhile then moved the meeting inside. On a hot day that A/C feels pretty good.

Thanks to the Overton's for hosting the meeting and providing great food and drinks.

If you haven't picked up your T-shirt yet, they will be available at the next meeting at a cost of \$9.00.

If you ordered a belt buckle or plaque Jeff Gannaway will take your money for that.

See you at the next meeting we'll have a good time at Jennings Park

and hopefully a cool evening!

Get out that hot rod, street rod, muscle car, rat rod, antique car, cruiser or whatever you call your special car or truck and drive it!

BUBBA'S TEK-NIKAL TIPS
(NOT TO BE TAKEN SERIOUSLY)
SUBMITTED BY JEFF GANNAWAY

More Tek-nikal tips to come in upcoming newsletters!

"FOOL PRESSURE CHART"

(For those who refuse to use a pressure gauge)

Due to the fact that most technicians do not want to take the time to correctly test the fuel pressure, we have developed the following...

With the engine running, either push the schrader valve in or loosen the fuel line **THEN IF**:

Fuel does not come out of the test area...	Pressure is approx 0 psi
Fuel hits the hood insulation...	Pressure is 5 - 8 psi
Fuel squirts over the fender...	Pressure is 10-15 psi
Fuel splashes off the fender onto the hood insulation and into the next repair bay...	Pressure is 25-30 psi
Fuel squirts to the garage roof, all over the car, including the shop owner...	Pressure is 30-50 psi
